

Professional Master Course in Veterinary Homeopathy 2023–2024: Lecture Schedule

Module 1: Introduction to Homeopathic Theory & Principles, Taking the Acute Case

Welcome to Module 1.1! Here you will find your daily lecture schedule and corresponding [Zoom links](#) for every lecture. Please note the following:

- All lectures will be recorded.
- Please ensure you have the ability to turn your cameras on for discussion and question time sessions.
- There are regular breaks in the schedule in order to create a sustainable lecture day for students and faculty.
- We make every attempt to run to schedule, however, occasionally lectures can run-over due to student questions.
- There is space in the daily schedule for you to write down any reading assignments provided at the end of the lecture day or to record any notes to yourself regarding topics you would like to review.

Module 1.1 Summary:

We will spend Module 1.1 laying the essential foundations — starting by learning about the life work of Samuel Hahnemann, the early science of homeopathy, and the history of homeopathy. We then progress to the foundation principles and concepts, remedy preparations and potencies, definitions of key concepts, materials, and resources. Finally, we will introduce the basics of taking the acute case and how to perform a hand analysis, introduction to homeopathic software, and several case studies which will help elucidate the principles introduced.

The goal of Module 1.1 is to focus on developing a solid theoretical foundation that we will build upon during the rest of the course. In order to have accurate prescriptions, your thought process must be derived from understanding theory accurately. Thus, we advise in Module 1.1 to focus on getting your theory principles correct, and then in Module 1.2 we will delve deeper into how to perform acute case work.
