*Important Details:

- These packages have been specially curated for PIVH students.
- The repertories included in both packages are New World Veterinary Repertory, Kent, Phatak, Clarke, TBR, Boericke, and Boger (x3).
- For a full list of reference materials included in each package, go to page 8 in the [RadarOpus Packages Comparison Sheet](#). For the Basic Package, look at column #6, and for the Advanced Package, look at column #9.
- Filter by Pitcairn's Anti-Miasmatic Remedies is a feature that is not yet available but coming soon.

What You Should Know About RadarOpus:

Here at RadarOpus, we believe that you should choose the homeopathic software that's best for you. Of course, there are a lot of considerations that go into the decision of purchasing homeopathic software and cost is not the least of them. Keep in mind, when it comes to the success of your homeopathic practice, especially for patients that don't talk to you, the quality of your homeopathic software is of the utmost importance. And it's a decision you only want to have to make once. Here are some reasons that people choose RadarOpus over other software programs:

- RadarOpus is a lifetime license, not a recurring subscription service. Pay once, instead of paying monthly forever.
- RadarOpus is available off-line; an internet connection is not required. This is especially helpful for making house calls where you don't have reception or WiFi.
- You can customize your package based on your needs so you only have to pay for what you need and want.
- We have a proven track record; we've been around since 1982.
- RadarOpus is the only homeopathic software to have Synthesis repertory.
- We are a passionate team committed to supporting homeopathy, supporting you in your homeopathic practice, and furthering the field.
- We take training you in the program seriously. After you make such a significant investment, we want to be sure you know how to use it! We offer free webinars regularly and have a wide span of free training videos available 24/7 on the [RadarOpus Academy](#) website.
- We offer free tech support via the ticketing system for all users and free live support for users running the latest version of RadarOpus.
- We've seen time and time again, a user starting out with a competitor to save on upfront costs, only to ultimately switch to RadarOpus. Not only is money lost, but also lots of time in having to learn a brand new program. We highly encourage users to carefully consider their decision upfront so they only have to invest their time, effort, and energy into learning one software program. As such, we recommend starting with a program that you know will work for you in the long-term.
- We're available by phone, email, and text message for customer service and sales-related questions. Of course, we're biased and think that you should choose us. But ultimately, we want to make sure that you choose the software that's right for you. If you have any questions to help you in the decision-making process, please [let us know.](#) You can call or text 716-203-1622 or email us at orders@radaropus.us.
