

## Professional Master Course in Veterinary Homeopathy 2023–2024: Lecture Schedule

---

### **Module 3: Prescription Evaluation, Mastering the Second Prescription in Chronic Cases**

Welcome to Module 3.2! Here you will find your daily lecture schedule and corresponding [Zoom links](#) for every lecture. Please note the following:

- All lectures will be recorded.
- Please ensure you have the ability to turn your cameras on for discussion and question time sessions.
- There are regular breaks in the schedule in order to create a sustainable lecture day for all participants.
- We make every attempt to run to schedule, however, occasionally lectures can run-over due to student questions.
- There is space in the daily schedule for you to write down any reading assignments provided at the end of the lecture day or to record any notes to yourself regarding topics you would like to review.

### **Module 3.2 Summary:**

We will continue the theme of Module 3 by focusing on evaluating remedy reactions – what was the patient’s response to the prescription, and how do we interpret the results to understand what to do next? In Module 3.2 we will delve more deeply into the clinical aspects of chronic case work and prescription evaluation with active case examples. Now that you have more experience in practicing your casework, we will also review the art of case taking – how to ask the right questions, in order to acquire the details you need to prescribe most accurately. There will be many clinical cases to sink your teeth into, including how to approach the one-sided case. We will do a deep dive into the remedy Bar-c to learn more about developmental cases, with two exciting case examples to bring the remedy to life. We will explore how to study the materia medica, from advice of Dr. Constantine Hering, and finish the weekend by discussing the treatment of mental and emotional disease. We hope you enjoy!
